**\*See Table 2 for 2005-2007 averages**

**Note:** Data are for year 2000 (most recent available at municipality level) unless otherwise noted.

- (1) Students must demonstrate performance at the proficient level or above in all five subject areas (social studies, mathematics, science, reading, and writing) to meet graduation requirements. Suburban groups and county rates are median rates.
- (2) Near poverty is defined as the percent of persons whose incomes are above the federal poverty level but are less than 200 percent of the threshold income level, which was \$17,029 for a family of four in 2000.
- (3) Using 2007 population estimates based on 2000 census to calculate rates.
- (4) Tally of total number of reported disabilities; one person can have up to five disabilities. See *Older Persons Social Indicators 2003-2004*, Indicator 20.
- (5) SCHIP is State Children's Health Insurance Program, also known as Healthy Start.

\* The American Community Survey now provides multi-year data averages based on three successive years of samples (2005, 2006, and 2007) for municipalities with populations between 20,000 and 65,000.

CI = Upper and lower confidence interval at the 90 percent level. When comparing rates for different areas (e.g., Cleveland to Cuyahoga County), or the same area over time, part of the difference may result from random fluctuations. The upper and lower confidence limits represent this "margin of error." If the confidence intervals for the rates in question overlap, then they fall within each other's "margin of error" and we cannot conclude that the rates differ.

**Bold numbers indicate statistically significant change since 2000.**
