## **Number of Uninsured Ohioans and Uninsured Children Climbing**

**Community Solutions President and Executive Director Releases Statement on new U.S. Census Bureau Numbers**

"The Center for Community Solutions is concerned that the number of uninsured Ohioans is climbing, but even more concerning is the increase in the number of children in the United States who are uninsured. Many of these kids were likely eligible for Medicaid coverage but weren't enrolled either because of red tape or because of trimmed outreach efforts. Now it is even more important for Ohio to ensure that its enrollment systems are working efficiently, and to activate outreach efforts to get uninsured children covered."

John Corlett  
President and Executive Director  
The Center for Community Solutions
